OFFICE DESKS

Metal frame office desks are designed for the widest use at home or at work, in classrooms or in meeting rooms. Laminated chipboard with a polymer layer provides a zero seam effect and improves moisture resistance and heat resistance of the elements made out of laminated chipboard. Rigidity of the structure is ensured by the developed in-house system of fastening metal frame elements that makes NT series office desks convenient and reliable in operation.

SCREENS. CABLE ORGANIZERS

Zoning system is represented by desktop screens made of laminated chipboard in the color of the furniture facades. The design of the panels is universal, suitable both for zoning workplaces and as a protective panel of the table. To ensure the aesthetics and neat appearance of the room, protective panels can be painted in the color of the metal frame.
